

INDU PRIYA PUCHAKAYALA

Software Engineer | Full Stack Developer

Hyderabad, India | Open to India & Global Opportunities

indupriya285indu@gmail.com | +91 91008 67671 | [linkedin.com/in/puchakayala-indu-priya](https://www.linkedin.com/in/puchakayala-indu-priya)

PROFESSIONAL SUMMARY

Software Engineer with 8 years of experience designing and maintaining backend and platform services for enterprise SaaS products. Skilled in building secure, scalable REST APIs, implementing role-based access control, and owning production reliability through root-cause analysis and issue resolution. Experienced in PHP, Laravel, JavaScript, TypeScript, Node.js, Angular, Vue.js, Google Cloud Platform (GCP), and cross-functional collaboration in distributed Agile teams. Proactively integrates AI-assisted development tools — Claude, ChatGPT, and OpenAI Codex — into daily engineering workflows to write cleaner code faster.

CORE SKILLS & EXPERTISE

- **Languages:** JavaScript, TypeScript, PHP, Python
- **Backend & Platform:** Node.js, PHP, Laravel, REST API Design, RBAC / Access Control
- **Frontend:** Angular, Vue.js, HTML5, CSS3, Component-driven Architecture, Jest
- **Databases:** MySQL (SQL), MongoDB (NoSQL)
- **Cloud:** Google Cloud Platform (GCP) — image/file uploads via GCP Storage
- **Reliability & Delivery:** Production Issue Triage, Root-Cause Analysis, Issue Resolution, CI/CD
- **Tools:** Git, Docker, Linux, PHPStorm, VS Code
- **AI-Assisted Development:** Claude, ChatGPT, OpenAI Codex
- **Methodologies:** Agile, Scrum, Distributed Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

Software Engineer III — TapClicks India Pvt. Ltd. – Hyderabad

June 2022 – Present

- Own end-to-end development of backend and platform services for business-critical SaaS modules used by enterprise customers, including Orders, Campaign, Flight, and Task Management modules.
- Designed and built a configurable Kanban-style Task Management module end-to-end (backend APIs and frontend UI), letting teams create, assign, and track tasks across custom board stages.
- Design and maintain RESTful APIs and backend services in PHP, Laravel, and MySQL, supporting complex business logic and entity relationships.
- Implemented Role-Based Access Control (RBAC) for module-level and action-level permissions, applying secure-by-design access patterns.
- Integrated Google Cloud Platform (GCP) Storage to handle image and file uploads for platform features.
- Built the frontend for a configurable Dynamic Form Builder supporting orders, line items, and client forms, letting non-technical users create data-capture forms without developer involvement.
- Built the frontend UI for configurable Push Connector Widgets that send line-item data to third-party platforms, collaborating with backend engineers on integration flow and payload structure.
- Built the email templates, frontend notification configuration UI, and parts of the backend for an event-driven, in-app notification and campaign integration system.
- Handle production incidents end-to-end: triage, diagnosis, resolution, and post-incident follow-up.
- Participate in architectural discussions, code reviews, and release planning; collaborate with Product, QA, and cross-functional teams in Agile sprints.
- Use Claude, ChatGPT, and OpenAI Codex to accelerate development, debugging, testing, and documentation.

Full Stack Developer — Report Garden Technologies Pvt. Ltd.

June 2019 – May 2022

- Built PHP backend features and frontend components in Angular and Vue.js for an enterprise SaaS platform serving digital marketing and enterprise users.
- Built the frontend for language pack / localization support, enabling the platform to serve multiple locales.

- Handled a wide range of bug fixes across the platform to improve overall stability and reliability.
- Assisted in database design, API development, testing, and production support.

Junior Associate Consultant — DataFoundry Software Pvt. Ltd. – Bengaluru *May 2018 – June 2019*

- Learned Node.js and Angular on the job, building proof-of-concept chat applications with authentication and role-based access control.
- Built backend services on the MEAN stack using Node.js and Express.js.
- Delivered end-to-end features across multiple projects following Agile practices.

KEY PROJECTS

Task Management Module (Kanban View)

- Designed and built end-to-end — backend APIs and frontend UI — for a configurable Kanban-style task management module within TapClicks' enterprise SaaS product.
- Enabled teams to create, assign, and track tasks across custom board stages without relying on spreadsheets or email threads.

In-App Notification & Campaign Integration System

- Built the email templates, frontend notification configuration UI, and parts of the backend for an event-driven, in-app notification system.
- Supported email and broadcast delivery triggered by workflow and campaign events.

Dynamic Form Builder

- Built the frontend for a configurable form builder supporting orders, line items, and client forms.
- Let non-technical users create and customize data-capture forms without developer involvement, generating structured payloads for downstream API integrations.

Push Connector Widgets (Line Item Integrations)

- Built the frontend UI for configurable push connector widgets that send line-item data to third-party platforms.
- Collaborated with the backend team on the integration flow and payload structure.

Comment & Reply System

- Built the frontend for a comment/reply feature enabling threaded discussions on records within the platform.

EDUCATION

Bachelor of Engineering

Prasad V Potluri Siddhartha Institute of Technology, Vijayawada | 2014 – 2018
